

PRICE SHEET FOR THE PRODUCTION OF IVF EMBRYOS
FROM THE TERMINAL COWS

Evergen Biotechnologies Inc. provides the service of producing IVF embryos from the terminal cows. The charges for this service are as follows:

A. Basic service charge – \$ 100

B. Embryo production charges

- a. 0 embryos – No additional charge
- b. 1 to 3 embryos –\$ 100 per embryo
- c. 4 or more embryos –\$ 100 per embryo for the first 3 embryos and
\$ 75 per embryo from 4th embryo onwards

(e.g. if in total 5 embryos are produced, the customer needs to pay \$100 basic service charge + \$300 for the first three embryos + 150 for the additional two embryos. The total charge is \$550).

C. Embryo vitrification charges

Clients are encouraged to transfer embryos fresh into their synchronized recipients. However, due to paucity of available recipients, if the client wants the embryos to be frozen (vitrified), Evergen can do this at \$ 25 per embryo. Evergen can provide embryo thawing media at no additional cost to the clients.

D. Optional charges

- a) Saline with antibiotics for ovary transportation
 - Option 1:* Evergen can ship the saline with antibiotics free of cost, but will charge the client for shipping.
 - Option 2:* The client can procure saline with antibiotics locally.
- b) Semen for IVF
 - Option 1:* The client provide semen
 - Option 2:* Evergen provides semen at \$25/straw

E. Additional costs to be borne by the client

- 1. Ovary transportation to Evergen lab.
- 2. FSH (If administered before putting down the cow).
- 3. Embryo transport back to the farm or shipping and handling charges
